Project management tools- JIRA

EXPERIENCE

SQUARE YARDS

August 2023 - Present

2DD

(Gurugram)

- Contributed to the development of a web application named 2DD using Next js and Typescript, designed to display 2D drawings generated from 3D modeling software.
- Implemented advanced features such as commenting, annotation, text writing, and drawing functionalities using React Konva library.
- Led the frontend development efforts, collaborating with the team to implement interactive features and user interface enhancements.

Blocks Web App

- Developed a comprehensive documentation website leveraging Docusaurus and React.js, providing users with a seamless browsing experience and easy access to product information and resources.
- Integrated a robust build upload feature, allowing authorized users to effortlessly upload builds directly to the website, enhancing accessibility to the latest software versions and updates.
- Provided ongoing maintenance and support for the documentation website, including regular updates, enhancements, and troubleshooting, to meet evolving user requirements and address emerging challenges.

Smart Agent

- Spearheaded the integration of the Payment UI/API within the Subscription module, ensuring seamless and secure payment transactions for users.
- Innovatively designed and implemented a speedometer feature, seamlessly integrated to showcase SYscore for listing properties, enhancing user engagement and property evaluation.
- Demonstrated expertise in data security by spearheading the encryption of payloads, safeguarding sensitive information and ensuring compliance with industry standards.

ALBANERO DEV PVT LMT

January 2022 - July 2023

Helix Dashboard

(Hyderabad)

- Spearheaded the design and implementation of the Shopping Dashboard, utilizing **Vue.js**, **VueX**, **Vuetify**, and **TypeScript**, ensuring an intuitive and efficient user interface.
- Collaborated closely with cross-functional product team members to seamlessly integrate new features into the platform.
- Engineered and implemented role-specific permissions for diverse features, enhancing user access control and security.

Data Mesh Platform

- Led the development of the Data Mesh Platform, catering to clients seeking seamless data migration solutions.
- Applied **React.js** and **Material UI** to craft innovative features and intuitive user interface designs, contributing to the platform's robustness and user experience.
